

1. THE DATA STRUCURE

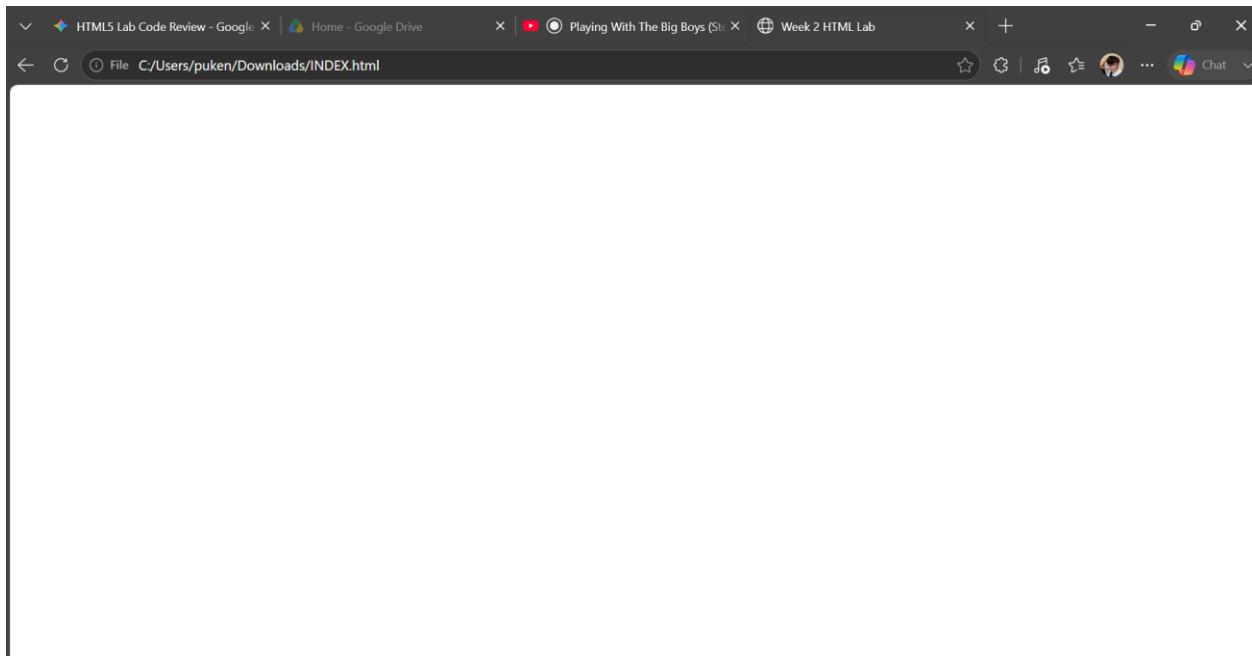

Step 1: Declared HTML5 Standard Add `<!DOCTYPE html>` on line 1 to force modern standards mode in the browser.

Step 2: Set Root & Language Open `<html lang="en">` to create the document root and set English for accessibility.

Step 3: Added Head Metadata Insert `<head>` containing UTF-8 encoding, responsive viewport settings, and the browser tab `<title>`.

Step 4: Created Body & Placeholder Open `<body>` for visible content, add `<!-- Content goes here -->`, and close all tags.

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4 <meta charset="UTF-8">
5 <meta name="viewport" content="width=device-width, initial-scale=1.0">
6 <title>Week 2 HTML Lab</title>
7 </head>
8 <body>
9 <!-- Content goes here -->
10 </body>
11 </html>
```

2. SEMANTIC HEADER

Step 1: Create Header Container

Opened `<header>` to establish the semantic top banner for the page.

Step 2: Add Main Title

Inserted `<h1>My HTML5 Web Page</h1>` to set the primary document title.

Step 3: Define Navigation Structure

Added `<nav>` containing an unordered list (`<ul>` and `<li>`) for navigation items.

Step 4: Attach Anchor Links & Close

Inserted `<a href="#about">` and `<a href="#multimedia">` inside list items for smooth jump links, then close `</header>`.

```
INDEX.html
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Week 2 HTML Lab</title>
7 </head>
8 <body>
9   <header>
10    <h1>My HTML5 Web Page</h1>
11    <nav>
12      <ul>
13        <li><a href="#about">About</a></li>
14        <li><a href="#multimedia">Multimedia</a></li>
15      </ul>
16    </nav>
17  </header>
18 </body>
19 </html>
```

My HTML5 Web Page

- [About](#)
- [Multimedia](#)

3. MAIN SECTION

Step 1: Open Main Content Shell Created the `<main>` tag to encapsulate the page's unique primary content.

Step 2: Define Section & Anchor ID Added `<section id="about">` to group related information and match the `#about` navigation link.

Step 3: Add Section Heading Inserted `<h2>About HTML5</h2>` to establish a sub-heading hierarchy under the main `<h1>`.

Step 4: Insert Paragraph & Close Added the `<p>` element with descriptive text, then close `</section>` and `</main>`.

```
INDEX.html
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Week 2 HTML Lab</title>
7 </head>
8 <body>
9   <header>
10    <h1>My HTML5 Web Page</h1>
11    <nav>
12      <ul>
13        <li><a href="#about">About</a></li>
14        <li><a href="#multimedia">Multimedia</a></li>
15      </ul>
16    </nav>
17  </header>
18  <main>
19    <section id="about">
20      <h2>About HTML5</h2>
21      <p>HTML5 introduces semantic elements and multimedia integration, making web pages more accessible and structured.</p>
22    </section>
23  </main>
24 </body>
25 </html>
```

My HTML5 Web Page

- [About](#)
- [Multimedia](#)

About HTML5

HTML5 introduces semantic elements and multimedia integration, making web pages more accessible and structured.

4. Multimedia Content

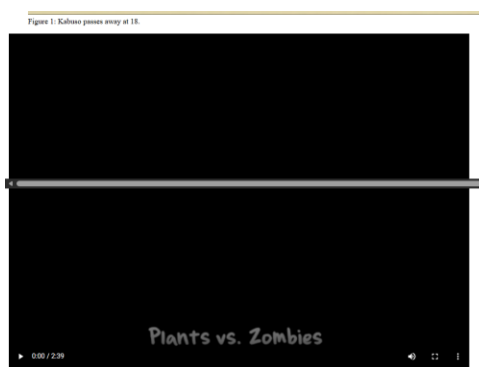

Step 1: Open Multimedia Section Added `<section id="multimedia">` to group media assets and connect with the `#multimedia` header link.

Step 2: Add Section Heading Inserted `<h2>Multimedia Features</h2>` for sub-heading hierarchy.

Step 3: Embed Image with Caption Wrapped `<img>` in a `<figure>` container and add `<figcaption>` to semantically link the image and its descriptive text. Include alt text for screen reader accessibility.

Step 4: Add Native Video Player Inserted `<video controls>` with a nested `<source>` tag for native playback, adding fallback text for unsupported browsers.

```
index.html
4  <meta name="viewport" content="width=device-width, initial-scale=1.0">
5  <title>Week 2 HTML Lab</title>
6  </head>
7  <body>
8  <header><DOCTYPE html>
9
10 <h1>My HTML5 Web Page</h1>
11 <nav>
12   <ul>
13     <li><a href="#about">About</a></li>
14     <li><a href="#multimedia">Multimedia</a></li>
15   </ul>
16 </nav>
17 </header>
18 <main>
19   <section id="about">
20     <h2>About HTML5</h2>
21     <p>HTML5 introduces semantic elements and multimedia integration, making web pages more accessible and structured.</p>
22   </section>
23 </main>
24 <section id="multimedia">
25   <h2>Multimedia Features</h2>
26   <figure>
27     
28     <figcaption>Figure 1: Kabosu passes away at 18.</figcaption>
29   </figure>
30   <video controls>
31     <source src="Zombies on Your Lawn MUSIC VIDEO (HD 60fps) - Plants vs. Zombies Ending Credits Song.mp4" type="video/mp4">
32     Your browser does not support the video tag.
33   </video>
34 </section>
```

5. FOOTER

Step 1: Open Semantic Footer Container

Inserted the `<footer>` tag at the bottom of your page content to define the document's closing section. Using a semantic `<footer>` tag rather than a generic `<div>` signals to browsers and screen readers that this block contains secondary site metadata.

Step 2: Add Copyright & Attribution Text Nested a `<p>` paragraph element inside the footer to hold the author details and date:

- Replaced [Your Name] with my actual name *Brian Viel V. Borje*.
- Added © 2025 to provide a clear copyright statement for the web document.

Step 3: Close Document Tags

Closed `</p>` and `</footer>` to complete the footer element.

```
1 <!DOCTYPE html>
2 <html>
3 <head><!-- DOCTYPE, HTML5 -->
4
5 <title>My HTML5 Web Page</title>

Reflection

It has been 6 years since I last used html the last person who taught me html or the first was Mr. Estiller who passed away last year aged 31, html is the first programming language I've ever learned (although sir Andy might say otherwise) so it has a big impact on how I code the constant space, slashes '^' and greater than and less than brings back lots of memories and nostalgia of sitting in front of a computer in a dark computer lab in a catholic school memorizing and typing than looking back at my textbook again and again until the teacher gave me the boot.

From this demo I've learned a few things that I never got to complete cause of COVID or I probably just forgot how to code or organize them either way I finally regained my understanding from the main to the multimedia one which the latter is quite difficult to memorize and I had trouble with the image and video cause it turns out I have to place the medias with the index and with that out the way I got a good feeling that html or JavaScript will be fun and a bit more challenging.
